## **UNII Device Declaration Letter**

То	whom it may con	cern:							
	have declared b vice FCC ID: 2AJ		for FCC	equipment	authorizati	ion,			
(1) DFS Device:			<ul><li>☐ Master</li><li>☐ Client with Radar detection capability</li><li>☐ N/A</li><li>☐ Client without radar detection capability,</li></ul>						
(2)	Active / Passive	Scanning , a	dhoc mo	de access p	oint capab	ility			
	Frequency Band (MHz)	(the device transmit a	Active Scanning (the device can transmit a probe (beacon))		passive scanning (where the device is can listen only with no probes)		: Mode bility	Access point capability	
	2412-2462	Yes	☐ No	Yes	□No	Yes	☐ No	Yes	□ No
	5180-5240		☐ No	Yes	⊠ No	Yes	⊠ No		□ No
	5190-5230		☐ No	Yes	No	Yes	No		N
	5210	⊠ Yes	☐ No	Yes	⊠ No	Yes	⊠ No		□ N
	5745-5825	⊠ Yes	No	Yes	⊠ No	Yes	⊠ No	⊠ Yes	□ No
	5755-5795 5775		☐ No	Yes Yes	⊠ No ⊠ No	Yes Yes	⊠ No ⊠ No		No
(5)	pls check below:  A master device is defined as a device operating in a mode in which it has the capability to transmit withoutreceiving an enabling signal. In this mode it is able to select a channel and initiate a network by sending enablingsignals to other devices  A client device is defined as a device operating in a mode in which the transmissions of the device are under controlof the master. A device in client mode is not able to initiate a network.  For client devices that have software configuration control to operate in different modes (active scanning in some andpassive scanning in others) in different bands (devices with multiple equipment classes or those that operate on non-DFS frequencies) or modular devices which configure the modes of operations through software, the application mustprovide software and operations description on how the software and / or hardware is implemented to ensure thatproper operations modes cannot be modified by end user or an installer.  Apply  Does not apply  (If apply, pls help to provide explanation on it was implement, and how software was controlled)								
	Sincerely,	ana un
